WELCOME MESSAGE

Welcome to Bloom Institute of Technology, and congratulations on taking the first step toward a high-paying career in tech.

The most important thing we tell new Bloom Institute of Technology students is: commit now to hustling harder than you ever have before.

You have a critical opportunity to develop your skills between now and graduation, and there’s a good chance that the next several months will swing the trajectory of your career more than any others. Your time at Bloom Institute of Technology will be some of the most intense, impactful months of your life – now is the time to put your head down and work, and every instructor, career coach, and staff member will do everything possible to help you succeed. We’re so excited that you’re here.

Let’s get started.

Sincerely,

Austen Allred,
Co-Founder & CEO
MISSION
The mission of Bloom Institute of Technology is to unlock potential, regardless of circumstance. That means working with untapped or underutilized talent, and training that talent for in-demand careers in the technology fields including web development, engineering, data science, and enterprise backend development.

Bloom Institute of Technology is committed to making the field of technology more accessible, and will provide an educational environment that respects the values of individual students and their intellectual, cultural, and social development. It is Bloom Institute of Technology’s intention to:

- Foster among students, faculty, and staff a commitment to life-long learning.
- Provide opportunities for students to exercise a positive influence and be productive in society.
- Prepare students for entry-level employment in technology fields including web development, software engineering and data science.

OBJECTIVES
In order to fulfill its mission, Bloom Institute of Technology is committed to the following objectives for its educational and training programs:

- To provide the basic and prerequisite knowledge to specialize in the field of technology via online learning on Zoom and multiple tools.
- To educate students to become well-qualified professionals in their chosen field of Data Science, Enterprise Backend Development, or Full Stack Web Development.
- To provide practical training to enhance students’ capabilities in their program.

APPROVAL
Bloom Institute of Technology is a private institution approved to operate by the California Bureau for Private Postsecondary Education. Approval to operate means the institution is compliant with the minimum standards contained in the California Private Postsecondary Education Act of 2009 (as amended) and Division 7.5 of Title 5 of the California Code of Regulations.

HISTORY
Founded in 2017, Bloom Institute of Technology (“BloomTech”) is a unique model of higher education in which the institution invests in its students, instead of the other way around. Bloom Institute of Technology requires no upfront tuition. Tuition payments do not begin until students find a job providing an annual salary of at least $50,000. This commitment from Bloom Institute of Technology supports its mission of finding untapped or underutilized talent and training that talent for in-demand jobs in technology. The institution has an office in San Francisco, CA, and students attend
remotely.

**FACILITY AND EQUIPMENT**

Bloom Institute of Technology offers training online in a virtual classroom. Students complete distance education coursework at a location they determine.

System Requirements

- **Minimum**
  - 1.6 GHz Processor
  - 4 GB RAM
  - 120 GB Hard Drive
  - Web Cam
  - Microphone
  - Consistent access to internet, e.g., Wi-Fi

- **Recommended**
  - 2 GHz Processor
  - 16 GB RAM
  - 256 GB Hard Drive (preferably solid state)

Recommended operating systems (in descending order): macOS, Windows 10 Pro, Ubuntu.

Students using other versions of Windows will likely encounter major issues with virtualization tools that are required for completing coursework. Instructors will not be able to provide technical support in these cases. For this reason, Bloom Institute of Technology recommends only Windows 10 Pro for PC users.

Chromebooks are *not* supported, as coursework involves installing and running software locally.

**TUITION AND FEES**

<table>
<thead>
<tr>
<th>Items</th>
<th>Registration Fee</th>

<td>$21,950</td>
<td>$22,505</td>
</tr>
</tbody>
</table>

*STRF: $2.50 for every $1,000 of tuition rounded to the nearest $1,000. STRF is not due for readmission students if STRF was previously collected and is stated in the student’s enrollment agreement.

**Cost of total charges for a period of attendance and estimated schedule of total charges for the entire educational program.*
TUITION PAYMENT OPTIONS

Pay tuition in one sum:
- Students owe the full tuition amount after they sign the Enrollment Agreement and before their first day of instruction.

3 Part Installment Plan:
- DATA SCIENCE & WEB PROGRAMS - Students owe the first installment of $7,317 after they sign the Enrollment Agreement, the second installment of $7,317 is due by the first day of sprint 7, and the third installment of $7,317 is due by the first day of sprint 13.
- ENTERPRISE BACKEND PROGRAM - Students owe the first installment of $7,317 after they sign the Enrollment Agreement, the second installment of $7,317 is due by the first day of sprint 10, and the third installment of $7,317 is due by the first day of sprint 19.

Deferred Tuition:
- Students may pay tuition, in full or in part, via deferred tuition. Deferred tuition is a third party loan offered by a third party. If the amount of your loan is for less than the Total Tuition, students must pay the remaining balance as invoiced by Bloom Institute of Technology. Bloom Institute of Technology will refund all amounts, if applicable to the third party lender.

Tuition installment payments are due before the start of the first day of each respective Sprint. Failure to make required tuition payments, on any plan, may result in academic suspension and/or withdrawal.

TUITION RESPONSIBILITY
Students are responsible for paying the full tuition amount listed above. If a student obtains a loan, financing, and/or other payment arrangement, that student is responsible for repaying the amount owed under agreement, or loan amount plus any interest or the amount owed, as applicable, in each case less the amount of any applicable refund if that student withdraws or is withdrawn. Once a student enrolls, the tuition amount will not and cannot be changed based on any factor other than Sprints ended as noted in this Catalog.

Tuition installment payments are due before the start of the first day of each respective Sprint. Failure to make required tuition payments, on any plan, may result in academic suspension and/or withdrawal.

Bloom Institute of Technology does not issue 1098-T or other tax forms for payments of upfront tuition or on your outcomes based loan.

STUDENT HOLIDAYS
Bloom Institute of Technology does not observe any student holidays or have scheduled vacation periods. Students' access to and consumption of curriculum will not be interrupted based on federal holidays or vacations. Students can take breaks at...
their leisure as long as they do not exceed the maximum program length or remain inactive as detailed in the Attendance and Engagement policy.

**STAFF HOLIDAYS**
BloomTech Staff will observe the below holidays and vacation breaks. Support staff may be limited but live lectures and support will still be available. The following are staff holidays:
- New Year’s Day - January 1st
- Martin Luther King, Jr. Day – third Monday of January
- President’s day - Third Monday of February
- Memorial Day – last Monday of May
- Juneteenth - June 19th, or the following Monday if this date falls on a weekend
- Independence day - July 4th
- Labor Day – first Monday in September
- Indigenous People Day - second Monday in October
- Veterans Day - Annually on November 11th
- Thanksgiving - Monday Before Thanksgiving through Friday the day after thanksgiving
- Winter Break – The Monday before Christmas through January 2nd

**ENROLLMENT PERIODS**
Enrollment happens on a rolling basis, meaning that students can begin the program when they are ready. Students may start the program once all required enrollment steps are completed including, but not limited to, signing the Enrollment Agreement, finalizing tuition options, completing pre-course work (if applicable), and completing the orientation program (if applicable). A student's start date is located on their signed Enrollment Agreement.

Students must progress to sprint three within thirty (30) days of the start date listed on their Enrollment Agreement. Failure to progress to sprint three within thirty (30) days may lead to the student being withdrawn.

**PROGRAM TERM DATES**
Timeframe for completion is calculated from the start date of the program as listed in the student’s Enrollment Agreement. Please see below for your program’s term date.

**Data Science and Full Stack Web Development:**
The anticipated completion date for Data Science or Full Stack Web Development students is six (6) months from the student's start date. Students may finish the program sooner or later, depending on their personal pace and needs in the program. As a result, the actual completion date(s) may be before or after 6 months, as long as the completion date is within the Maximum Program Length. The anticipated completion date for the student's program does not include any holidays, breaks, repeat courses, or leaves of absences the student may take.
Enterprise Backend Development:
The anticipated completion date for Enterprise Backend Development students is nine (9) months from the student's start date. Students may finish the program sooner or later, depending on their personal pace and needs in the program. As a result, the actual completion date(s) may be before or after 9 months, as long as the completion date is within the Maximum Program Length. The anticipated completion date for the student's program does not include any holidays, breaks, repeat courses, or leaves of absences the student may take.

MAXIMUM PROGRAM LENGTH
We believe that students that put in the work can be successful in the program regardless if they move quickly or need a little additional time with the curriculum. Students should be able to progress through and complete the program to earn a certificate of completion in a timely manner.

The maximum allotted timeframe for completion of the program does not override other policies within this catalog, the Enrollment Agreement, or the Student Guide regarding academic progression and/or successful completion. A student who is unable to successfully complete the program within the maximum allotted time frame outlined below may be withdrawn to prevent unintentional interest accrual.

Students with an extenuating circumstance may reach out via support ticket within The Hub to request an extension. If a student is withdrawn from Bloom Institute of Technology, the tuition proration policy will apply based on when they were withdrawn.

Data Science, Full Stack Web Development, Enterprise Backend Development
• Data Science, Full Stack Web Development, and Enterprise Backend Development students must complete the program within 18 consecutive calendar months.
• Timeframe for completion is calculated from the start date of the program as listed in the student's Enrollment Agreement, and is the same regardless of any observed holidays, Leave of Absence taken, or BloomTech office closure during the 18-month span.
• Students who are withdrawn for not completing their program in 18 months cannot be readmitted.

CURRICULUM PACING
Sprint progression and sprint completion in a timely manner are important to your coding development and growth. You may be reset to the start of the sprint you are in
if you take more than twenty (20) days to complete that sprint. Examples of when this would be done include if necessary to ensure you are prepared for the next sprint or in the event of a curriculum update. The twenty (20) days starts on the day you gain access to the sprint.

Continuous practice in your area of study is crucial to your success at BloomTech and in your professional career. Extended periods of inactivity may preclude you from successfully progressing in the program. In such cases, it may be necessary to repeat earlier portions of the program and you may be subject to withdrawal.

**REPEAT CONTENT POLICY**
Bloom Institute of Technology's competency based progression model allows students to repeat content that they have not yet demonstrated competency in. Learning at Bloom Institute of Technology follows a competency based progression model, and students may need to repeat portions of class to ensure students have the skills to succeed in their program and new field. That may mean extending the length of their program. If certain assessments are not passed, the student may repeat a portion of the program that covers the objectives they did not achieve. Students that are not demonstrating adequate effort or progress may be withdrawn from the program.

**CLASSROOM DAYS / HOURS**
Bloom Institute of Technology provides distance education courses/programs where the distance education coursework is completed at a location determined by the student. BloomTech's school hours are from 6:00am - 8:00pm (Pacific).

Breaks and mealtimes are at the student’s discretion.

**Full Stack Web Development, Data Science, & Enterprise Backend Development**
We've designed our programs to support our students on their individual journey towards a new career. Students may finish the program sooner or later, depending on their personal pace and needs in the program. As a result, a student's actual completion date(s) may be sooner or later than listed in their enrollment agreement.

Students will spend time outside of lecture hours working on projects, studying, and coding. Although our flexible schedule is designed to fit into a student’s life, a student must invest about 40 hours a sprint, including lecture hours.

Students have the option to choose their schedule during Labs, which may include live or recorded meetings, standups with their team, and more.

Breaks and mealtimes are at the student's discretion.

**ADMINISTRATION DAYS / HOURS**
Administration Office hours are every first and third Tuesday of every month from 10:00am to 12:00pm and 1:00pm - 4:00pm (Pacific). Unless the day falls on a federal
holiday or any holidays listed under “staff holidays”. If you’d like to meet outside of these hours please contact compliance@bloomtech.com to make arrangements.

ADMISSIONS ELIGIBILITY
To be eligible to apply and enroll at Bloom Institute of Technology, prospective students must:
- Be 18 years of age or older prior to the start date;
- Complete the admissions application and submit supplemental items
- Have a high school diploma or equivalent or pass Orientation Assessment in the free trial

ADMISSIONS PROCEDURE
Prospective students are encouraged to explore our web resources to learn more about Bloom Institute of Technology courses and admissions at https://www.bloomtech.com/admissions

To apply:
- Submit an online application at https://admissions.bloomtech.com/
- Complete Orientation
- Submit proof of high school diploma or equivalent or complete and pass the Orientation Assessment in the free trial.
- Provide documentation of a minimum score of 80 on the TOEFL iBT examination if the student is not proficient in English.

Applicants will be notified of the admissions decision via email.

ENROLLMENT PROCESSES
- A student’s start is conditional upon the admitted applicant completing all required enrollment checklist items by their start date.
- Be provided with the institution’s Course Catalog
- Receive, review, agree to, and sign the enrollment agreement
- Receive, review, and sign the School Performance Fact Sheet (SPFS).

INTERNATIONAL STUDENTS AND ENGLISH LANGUAGE SERVICES
Bloom Institute of Technology does not offer visa services to prospective students from other countries or English language services. Bloom Institute of Technology does not offer English as a Second Language instruction. All instruction occurs in English. English language proficiency is documented by passing the Orientation Assessment.

While Bloom Institute of Technology does accept students from all around the world, the following factors must be carefully considered if you are not a US citizen:
- Income Share Agreements are available to people who live in the US who are US Citizens, US Permanent Residents, DACA recipients, and European Union Citizens living within the European Union. Other people can still
attend Bloom Institute of Technology by paying the tuition upfront or arranging separate payment plan(s).
- Almost all courses are taught on Pacific Time so it is important to think about how you will adjust according to your time zone.

**NOTICE CONCERNING TRANSFERABILITY OF CREDITS AND CREDENTIALS EARNED AT OUR INSTITUTION**

The transferability of credits you earn at Bloom Institute of Technology is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the certificate or hours you earn in the educational program is also at the complete discretion of the institution to which you may seek to transfer. If the certificate or hours that you earn at this institution is not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason, you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending Bloom Institute of Technology to determine if your credits or certificate will transfer.

**TRANSFER OF CREDIT**

Bloom Institute of Technology does not accept hours or credit through transfer of credit challenge examinations, achievement tests, or experiential learning.

**ARTICULATION AGREEMENTS**

Bloom Institute of Technology has not entered into any transfer or articulation agreements with any other college or university.

**CANCELLATION AND REFUND POLICY**

**THE STUDENT’S RIGHT TO CANCEL**

If you withdraw or are withdrawn from BloomTech, the tuition proration policy will apply based on the effective date of your withdrawal.

**HOW REFUNDS WORK**

Within 30 days, amounts due to you, if any, will either be refunded directly to you if you prepaid. If any portion of the tuition was paid from the proceeds of a loan or by a third party, applicable refund shall be sent to the lender, third party or, if appropriate, to the state or federal agency that guaranteed or reinsured the loan.

If the student has received federal student financial aid funds, the student is entitled to a refund of monies not paid from federal student financial aid program funds.
HOW TO WITHDRAW FROM THE PROGRAM AND CANCEL YOUR ENROLLMENT

A student can withdraw by submitting a “Withdraw” support ticket within The Hub or by sending an email to support@bloomtech.com. Withdrawals are effective the date and time of the ticket or emailed request.

REFUND POLICY

For California residents, you will receive a prorated tuition amount if you have completed less than 60% of the program (<60%). Once you have completed 60% or more (≥60%) of the program you will not receive a refund. If you withdraw prior to starting Sprint 2 you will owe no tuition and receive a full refund for any amounts paid to BloomTech.

TUITION PRORATION FOR TUITION OWED AFTER WITHDRAWAL

To find out your exact balance please submit a supporting ticket in the Hub. Your withdrawal time is defined as the official time you give notice of your withdrawal to BloomTech or the day BloomTech gives you notice of you being withdrawn.

If you withdraw or are withdrawn following the start of Sprint 2, we will calculate owed tuition by your program’s hourly cost multiplied by the number of hours you earned. Hourly cost is determined by dividing your tuition by the number of credit hours in your program. Once you have completed 60% or more (≥60%) of the program you will owe the full tuition amount. Each sprint you complete is 40 hours.

The definition of a “sprint started” is as follows: A sprint starts when you submit and pass your final assignment/task in the prior sprint. At that time, you are automatically given access to the next sprint and are deemed to have started that next sprint. For example if you are a Data Science student and complete and pass your final assignment or task for sprint 1, you are given access to sprint 2, and have started Sprint 2.

BLOOM INSTITUTE OF TECHNOLOGY ‘S RIGHT TO WITHDRAW OR TERMINATE (DISMISSAL POLICY)

Bloom Institute of Technology can terminate a student’s enrollment or withdraw them at any time for failure to comply with policies in the Catalog. Students may be Bloom Institute of Technology can terminate a student’s enrollment or withdraw them at any time for failure to comply with policies in the Catalog. Students may be withdrawn for
inactivity, failure to make required tuition payments on any plan, or any code of conduct violations. If a student is withdrawn from BloomTech, the tuition proration policy will apply based on when the student is withdrawn. Depending on the reason for withdrawal, the student may not be eligible for re-admission

WITHDRAWAL
A student is deemed “withdrawn” from a BloomTech program when any of the following occurs:

- The student requests or initiates withdrawal.
- Bloom Institute of Technology withdraws the student for failure to comply with policies, including inactivity or code of conduct violations.
- Extended periods of inactivity without an approved Leave of Absence may subject you to withdrawal.

My official withdrawal date is (1) the date I give written notice of my withdrawal as required above; or (2) the date BloomTech gives me written notice that I am withdrawn. I understand the duration of a Sprint is 40 hours.

READMISSION POLICY
If a withdrawn student wishes to return to finish the program, they may return as a readmitted student within 6 months of their withdrawal date and:

- The student has not been previously readmitted.
- The student was not withdrawn due to the expiration of the max program length policy or for violations of the student code of conduct.
- The student must return to their original track of study.
- The student will be placed into the last sprint passed prior to withdrawal and must complete the program before the student's expiration of the max program length policy.

Upon readmission, readmitted students will need to pay a partially Non-Refundable Readmissions Application fee of $500. Readmitted students will also be required to arrange the payment of their outstanding tuition balance prior to returning (full tuition amount less any amounts previously paid). If a readmitted student withdraws or is withdrawn from the program after being readmitted, they cannot be readmitted.

Readmitted learners are not eligible to receive scholarships or tuition assistance grants.

GRADING SYSTEM
Final course grades are based on demonstration of meeting the learning outcomes as stated on each course syllabus.

P – Pass: Any course with a “P” grade is identified as successful completion to graduate.
**F – Fail:** Any course with a “F” grade must be repeated and passed to graduate.

**R – Repeated:** When a course is repeated to improve a previously earned grade, the first grade is replaced with a new grade upon completion of the repeat. Any course that has a grade of “F” (Fail) or “W” (Withdrawal) is required to be repeated. Any course with an “R” grade is not calculated into graduation requirements.

**W – Withdrawal:** Withdrawal, a “W” grade is provided when a student leaves the course or is withdrawn from the institution prior to the scheduled completion of a course. Any course with a “W” grade is not calculated into graduation requirements.

Incompletes - Bloom Institute of Technology does not give out incompletes.

A grading period is defined as one sprint: 40 hours. All grades are found in the learning management system.

Bloom Institute of Technology's response to, or evaluation of, each student lesson, project, or dissertation is returned to the student within 10 days after receipt. Final course grades are based on demonstration of meeting the learning outcomes as stated on each course syllabus.

**Satisfactory Progress**
Bloom Institute of Technology's standards of satisfactory progress apply to all students. Students must pass the requirements for each sprint in order to progress to the next sprint. Satisfactory Progress means meeting the requirements to progress through all program sprints and satisfying the clocked hours for the student's program within the time specified in the Maximum Program Length policy.

**Academic Probation**
If a student is inactive or not progressing at a rate aligned with their anticipated graduation date or maximum program length, BloomTech will reach out to the student to assist them in progressing or requesting withdrawal. Inactive learners who are unresponsive to multiple outreach attempts will be withdrawn to avoid unintentional vesting of tuition. There are no probationary periods.

**Remedial Work and Repeated Courses**
Bloom Institute of Technology does not offer remedial work. When a course or assessment is repeated, the higher grade for the repeated material will be considered in the determination of the student's grade average for the course of study.

**Attendance**
Attendance and participation in BloomTech courses is measured in multiple ways, including but not limited to taking attendance in live instruction experiences, verifying module & sprint project attempts, and activity in BloomTech’s learning management systems, etc. While students may choose to attend live or view recorded sessions,
attendance and engagement with the material is critical to success in the program. Learners who do not have activity on the learning management systems for more than seven days will be flagged as inactive, and BloomTech will reach out to verify enrollment. BloomTech may withdraw inactive students to protect them from unintentional further vesting of tuition.

Students who are unable to engage with the curriculum and make satisfactory progress due to extenuating circumstances may need to take a leave of absence.

**TARDINESS AND EARLY DEPARTURES**
Students who arrive late or leave early to a live instruction session will be able to attend a session at a future date of their choosing, or to review recorded content through the learning management system.

**MAKE-UP WORK**
Students that have missed a live lecture, assignment, project, or any other designed activity in the scheduled class time may make up for that work by doing so outside of scheduled class time.

**LEAVE OF ABSENCE POLICY**
A leave of absence (LOA) or “Hiatus” will be considered and may be granted at the discretion of BloomTech staff provided:
1. The LOA does not exceed 60 calendar days
2. The LOA is requested by the student in writing prior to the first day of the LOA;
3. The LOA is approved in writing by the institution prior to the first day of the requested LOA; and
4. The student is in good standing prior to the LOA request.

**STUDENT CONDUCT EXPECTATIONS**

**General Information**
The Code of Conduct is set forth to give Learners general notice of academic and non-academic expectations. At the Bloom Institute of Technology, we are committed to the success of our Learners. That focus drives everything we do. Besides providing a clear framework, the policies and procedures in the Catalog are designed to mirror expectations our Learners will see in a professional or workplace environment. Additionally, we want every Learner at BloomTech to have as positive a learning environment as possible - something we all play a role in.

The Code of Conduct should be read broadly and is not designed to define misconduct in exhaustive terms. The Code of Conduct is an overarching policy that also includes all published policies and procedures within the Catalog. All Learners are expected to
know and abide by the Code of Conduct and all published policies and procedures contained within the Catalog.

In addition, we may from time to time publish announcements to Learners about topics related to the Code of Conduct. We will endeavor to ensure that updates are reflected in the Catalog, but overall, we expect that Learners abide by guidance provided by staff.

**Student Rights and Responsibilities**
At the Bloom Institute of Technology, we value an educational environment that respects the values of individual Learners and their personal and professional development. We strive to create and maintain an environment in which individuals are treated with dignity, decency, and respect, and the best learning happens. Each learner has the responsibility to take an active role in their learning and understanding, and to contribute to an environment where all can learn.

As agreed to upon enrollment, Learners are responsible for reading and understanding the expectations and guidelines of BloomTech as stated in the Enrollment Agreement, Catalog, and Code of Conduct. If a Learner has questions about certain conduct, or whether an expectation applies in BloomTech's programs and activities, and it is not explicitly stated, they should reach out in a Support Ticket for clarification. Learners also have the responsibility to remain in communication with BloomTech administration, by checking their email, reading and engaging in Slack channels and direct messages, and reading all school announcements.

BloomTech protects Learner privacy. We do not provide personal information to non-service provider third parties except as requested by the Learner, or as required by subpoena, warrant, or as otherwise directed or permitted by law.

**A Note About Speech Rights**
BloomTech has both the right and responsibility to maintain a professional, respectful, and learning-centered environment. Although we welcome feedback and ideas, as a private institution, we may remove content that violates the Code of Conduct, is deemed to be disruptive to the learning environment, and/or is not aligned with BloomTech's mission, values, and/or goals.

**Scope and Application of the Code of Conduct**
The Code of Conduct, along with all other published policies and procedures in the Catalog may be applied to behavior that is in-person, written, or conducted online. Alleged violations of the Code of Conduct that occur outside of a Learner's active enrollment at BloomTech (during admissions, leave of absence, or post graduation) are also subject to the conduct process, up to and including withdrawal from the program.

Certain conduct may violate the Code of Conduct as well as the law. BloomTech reserves the right to investigate and to initiate the conduct process regardless of the
prospect of or pending civil or criminal proceedings. BloomTech's resolution process differs from legal proceedings in that the goal is to promote learning, growth, and to preserve the educational environment. BloomTech may move forward to resolution prior to, simultaneously with, or following criminal or civil proceedings. Resolution of an alleged violation will not change on the grounds that a civil or criminal case has been resolved via dismissal, settlement, or reduction.

Slack, The Hub, and email are our main tools of communication at BloomTech. We encourage Learners to engage in curriculum related discussions and ask for help through the appropriate BloomTech Hub Forums and support tickets. While we do not want to stop the gathering of BloomTech Learners outside of official channels we cannot as a school be held liable for anything that happens in the spaces that we do not govern. However, the school reserves the right to further investigation and possible removal of a Learner for offenses such as bullying, harassment, etc. if such behavior is brought to our attention.

Policies in the Catalog, including but not limited to the Code of Conduct, may be enforceable for incidents that happen outside of BloomTech that affect the BloomTech community (for example personal social media pages, Twitter, Facebook, or in-person meet ups). The following criteria will be used to determine if an incident that happens outside of BloomTech networks will be considered an alleged violation of the Code of Conduct:

1. When the incident was recognized by others as being carried out by a BloomTech Learner;
2. When the incident adversely impacted the mental, emotional, or physical health, safety, and/or security of BloomTech community members;
3. When the incident adversely impacted the mission and/or values of BloomTech; and/or
4. Whether the incident was a violation of federal or state laws or regulations, or local ordinances.

Process When a Violation of the Code of Conduct Occurs
We do not actively seek out violations of the Code of Conduct. If we come across an issue, or someone brings concerning behavior to our attention, BloomTech staff will work to determine if the behavior may be a violation of the Code of Conduct. If a violation is alleged (or confirmed), we will generally:

- Notify the Learner(s) involved
- Meet with the Learner(s) involved
- Gather information about the incident(s)
- Work to prevent reoccurrence
In most cases, Learners will be notified of the alleged violation (through Slack messaging and/or email address on file) and have an opportunity to meet with a BloomTech staff member to share their perspective. Additionally, BloomTech reserves the right to immediately remove a Learner from the School without notice or opportunity for a hearing for behavior deemed to be disruptive to the learning environment and/or not in line with BloomTech’s mission, values and goals. BloomTech may also take steps to limit a Learner’s access to the BloomTech community, for example Slack access, while an investigation takes place.

When determining if a Learner has violated a policy, BloomTech staff will look at the information to see if the violation is “more likely than not” to have occurred. When deciding the appropriate action to take, we consider the severity of the incident, the context in which it took place, and Learner communications, if applicable. A Learner’s lack of response to staff communication or refusal to participate in the process may also factor in the decision. Actions taken to prevent future occurrence may be educational in nature or may include actions up to withdrawal from BloomTech. If a Learner is found to be responsible for a violation of the Code of Conduct or other published policies, the Learner will be notified of the decision, along with any resulting outcomes up to, but not limited to being removed from platforms, repeating or reattempting academic work, temporary or permanent withdrawal from BloomTech, or other educational assignments.

**Participation and Attendance**
Attendance and participation in BloomTech courses is measured in multiple ways, including but not limited to taking attendance in live instruction experiences, verifying module and sprint project attempts, activity in the BloomTech learning management system, etc.

Inactivity of more than seven days may trigger a withdrawal process to protect learners from unintentional further vesting of tuition beyond Sprint 2.

**Coursework and Projects**
BloomTech expects Learners to complete each and every assignment given as part of the course because the concepts learned in one assignment are a building block needed for future assignments. Even if a Learner knows a concept, repetition solidifies the foundation of their knowledge. We encourage Learners to reach for stretch goals and practice on their own.

Coursework and relevant assignment and Sprint Challenge deadlines are housed in the Learning Management System. Learners are responsible for ensuring that their coursework is submitted in the appropriate manner and in line with the maximum time frame allotted for the program.

**Owning your Learning**
It is ultimately the Learner’s responsibility to take an active role in their learning and understanding, alongside the structure and support provided by BloomTech. This might mean that to master material, Learners might put in additional study hours beyond what is listed as the “average” amount of time. Or, that Learners might benefit from resources beyond BloomTech support channels, such as to learn another programming language or enhance their understanding of a concept and to prepare themselves. While we are here to provide support and assistance, Learners are ultimately responsible for their own learning and success.

**Asking for Help**
If a Learner feels lost or is stuck on an assignment, it’s their responsibility to reach out to the BloomTech community for help. Learners may not always be given the answer, but they will be provided with the tools to come up with the answer on their own. Learners should use the following steps in order when they need help on technical problems/challenges and coursework:

1. Use the 20 Minute Rule (work on the problem on your own for 20 minutes)
2. Post your question or issue in the appropriate Hub Discussion Forum
3. File an Instructional Support Ticket through the Hub

**Academic Integrity**
BloomTech expects Learners to understand and maintain high standards of academic integrity. The goal of BloomTech is that our Learners learn the material to competency. Asking for help and researching online are a key part of learning, and in the world of collaboration and open source, this can be tricky to navigate. Although you can search the web, read articles and documentation, and review code snippets and examples for help, you should be able to put all these assistance tools aside and write code from scratch. Learners should not submit any code or content that they did not write as their own work. For our purposes, breaches of academic integrity include, but are not limited to the following:

- **Inappropriate Collaboration** - Collaboration on assignments is prohibited unless explicitly permitted or directed by an instructor. Collaboration includes Learner, professional, and/or technological assistance other than personal research for inquiries.
- **Plagiarism and Cheating** - Plagiarism is a form of academic dishonesty that includes the wrongful appropriation of another's work, thoughts, ideas or expression. Plagiarism can include copying code or content from instructors, other Learners, outside sources, or generally submitting work that is not one's own. Giving your solution code to another Learner to copy, or copying another Learner's work, is considered cheating.
- **Sharing Solution Code** - BloomTech projects and curriculum are the property of BloomTech. Any unauthorized sharing of project solution code within or outside of the BloomTech community is considered cheating, and may result in dismissal from the program.
Inappropriate use of Intellectual Property and Copyright Violations - We expect all Learners to respect the intellectual property rights of BloomTech, instructors, staff, other Learners, as well as those of any and all external parties. BloomTech owns all code for BloomTech assigned projects. Learners own any code that they write for projects outside of the core BloomTech curriculum, even if these projects were written during their enrollment in BloomTech. Intellectual property violations include copyright violations, using, and/or linking materials to which you do not have the rights. BloomTech may request that you remove any content or material (either within Slack, The Hub, or externally) that is found to violate any Catalog policy, contractual term, law, and/or any intellectual property right. Content posted to BloomTech Slack spaces also belongs to BloomTech.

For any project you are submitting, you should be able to set research tools and notes aside and write your own code. In investigating suspected academic integrity violations, BloomTech staff may use the following questions to evaluate the situation:

1. Who created the original code and/or content?
2. For what purpose was that code and/or content created?
3. To what extent was the original code and/or content changed?

Behavioral and Community Standards
One of The Bloom Institute of Technology's most important jobs is building and maintaining a strong, supportive, positive learning environment that leads to successful career outcomes for all BloomTech Learners. BloomTech takes that job very seriously. Any activity (creating distractions, bullying, harassment, etc.) that negatively impacts the learning environment may result in being removed from the program. If removed from BloomTech for violations of the Catalog, Code of Conduct, Enrollment Agreement or other published policies, the Learner may qualify for a proration of their tuition.

Professionalism and Respect
BloomTech is a professional environment. It is expected that Learners act accordingly. Punctuality, timeliness, accountability, and open communication are crucial not only for a Learner's success at BloomTech, but also in their careers afterward. The professional expectations BloomTech requires of its learners are the same a learner's future employers will expect of them. Professionalism should be a theme that runs through a learner's work and interactions at BloomTech. This includes communication via Slack, The Hub, Zoom, content of a learner's work, and naming conventions. A good rule of thumb is: if a Learner wouldn't do or say it in front of an employer or colleagues at their job, they shouldn't do it here at BloomTech.

BloomTech is fortunate to have Learners, instructors, and staff from extremely diverse backgrounds. Contribute to creating a positive experience for everyone by being respectful in communication. Learners are expected to do their part to make
BloomTech a welcoming place to learn by encouraging their fellow Learners, offering support, and listening to others. BloomTech does not tolerate discriminatory, harassing, or insulting remarks to other Learners, instructors, staff, or anyone else, online or in person; for more detail see the Discrimination and Harassment policy below.

**Alcohol and Other Drugs**
Learners are expected to abide by local laws and regulations regarding the use of alcohol and other drugs. In addition, the following are considered violations if a learner does so while participating in BloomTech programs and activities:

- Consuming alcohol and other drugs during school hours. Other drugs include, but are not limited to, cannabis (in all forms), controlled substances, prescriptions (when used in any manner and/or by any person other than what has been prescribed by a medical professional), and the use of synthetic or natural substances ingested for an intoxication effect.
- Use or display of drug paraphernalia, including but not limited to items or objects used or designed for inhaling, ingesting, or otherwise introducing drugs into the body.
- Disorderly and/or disruptive behavior caused by the use of alcohol or other drugs.
- Exhibiting signs of intoxication during BloomTech programs and activities.

If a Learner has a concern about another individual regarding alcohol or other drugs, they should notify BloomTech staff by submitting a Support Ticket in the Hub.

**Property and Resources**
Learners are responsible for maintaining the appropriate security of BloomTech property, both tangible, like computers and tech equipment, and intangible intellectual property such as curriculum and content. Unless otherwise agreed in writing, BloomTech property in the Learner's possession or control must be immediately returned to BloomTech upon any extended leave, withdrawal, completion, and/or termination.

Learners may not take, attempt to take, keep in their possession, sell, or attempt to sell property (intellectual or physical), information, services, or accounts belonging to BloomTech or other individual(s). This includes, but is not limited to, loaned equipment. Learners also may not commit actual or attempted damage or destruction of any property or item, including intellectual or physical property, information, and/or accounts.

**Weapons**
Learners are expected to abide by local laws and regulations regarding the use and possession of weapons.
While participating in BloomTech programs and activities (lectures, support hours, study group meetings, etc.) it is expected that all Learners abide by the following expectations, regardless of local laws and regulations:

- Refrain from wielding, displaying, or using weapons or weapon paraphernalia while engaging in BloomTech programs and activities
  - Weapons include, but are not limited to: firearms, explosives, knives, clubs, martial arts weapons, swords, bows and arrows, hand grenades, or other objects that have been designed with the intent to harm another person or property.
  - Weapons also include, but are not limited to: pellet, BB, or airsoft guns, blackjacks, slingshots, Billy clubs, or metal knuckles (including replica or facsimile weapons), toy weapons, electroshock devices, stun guns, or any other devices that could reasonably be mistaken for a weapon or explosive.
  - Weapon paraphernalia includes, but is not limited to: ammunition, firearms accessories, empty holsters and magazines, and parts of a weapon.

**Discrimination and Harassment**

BloomTech strives to create and maintain an educational environment in which individuals are treated with dignity, decency, and respect. As such, BloomTech will not tolerate any form of harassment generally, and in particular, based on an individual's protected status that is unwelcome and is sufficiently severe, persistent, or pervasive; causes reasonable fear for safety; and/or interferes with or limits employment, education, or ability to participate in or benefit from BloomTech's programs, activities, or resources. BloomTech prohibits unlawful discrimination against and harassment of staff, instructors, and Learners. BloomTech will seek to prevent, correct, and discipline behavior that violates this policy, and such behavior may result in withdrawal from the school.

**Discrimination**

Discrimination under this policy is conduct directed at an individual or group of individuals because of their race, color, national origin, ethnicity, sexual orientation, gender identity, religion, gender, marital status, age, disability status, or genetic information that subjects the individual or group of individuals to different treatment so as to adversely affect the individual's or group of individuals' employment or educational experience at BloomTech.

**Harassment**

Harassment is conduct directed at an individual or group of individuals because of their race, color, national origin, ethnicity, sexual orientation, gender identity, religion, gender, marital status, age, disability status, or genetic information that has the purpose or effect of unreasonably interfering with an individual or group of individuals'
employment or educational experience or creating an intimidating, hostile, or offensive environment.

Harassment includes any verbal, physical, or online conduct and includes, but is not limited to: slurs, epithets, or other threatening, intimidating, hostile, or abusive treatment directed at an individual or group of individuals based on the protected statuses described above.

In order to constitute a hostile environment, the harassment must be sufficiently severe, persistent, or pervasive enough to create an environment that a reasonable person would find it intimidating, hostile, or abusive. A single incident may create a hostile environment if it is sufficiently severe. Additionally, while a single incident may not be classified as creating a hostile environment, the incident will be addressed so it is not repeated.

**Reporting Discrimination and Harassment**
Learners who believe they have been discriminated against or subjected to harassment in accessing BloomTech's programs or activities based on a protected status or otherwise, should submit a Support Ticket via the Hub. Complaints are treated confidentially to the extent possible.

**Retaliation**
BloomTech prohibits retaliation against any person because of that person's good-faith participation in the reporting, investigation, or resolution of any alleged violation of the Catalog, Code of Conduct, or other published policies. Retaliation can be physical, verbal, via third party, or using electronic means, and may include, but is not limited to: harassment, intimidation, threats, or adverse actions against a Learner, staff member, instructor, or other BloomTech community member. Retaliation may result in immediate removal from the school.

**Threatened or Actual Physical or Psychological Harm**
As a community of learners, BloomTech prohibits the following:

- Behavior that is threatening and/or intimidating, or harassing in nature and expresses or implies interference with personal safety, education, employment, or participation in BloomTech's activities, resources, or that causes the person(s) to have reasonable fear that such behavior is about to occur.
- Stalking, both physical and online. Includes, but is not limited to behavior that threatens or endangers the physical or psychological safety of a person(s), or creates a reasonable fear or intimidation of such a threat or action.
- Doxxing, which is uncovering and/or sharing a person's private or confidential information, often for the purpose of intimidation.
- Any act or series of acts of physical, social, or emotional domination or intimidation, commonly referred to as "bullying" that causes fear of or physical
Digital Environment Standards
While these expectations apply primarily to Zoom, The Hub, email, and Slack as they are the main forms of communication for the Bloom Institute of Technology, it is expected that all Learners abide by the expectations in this section during all school programs and activities, and on all BloomTech platforms.

Communication Guidelines
Professionalism is expected when creating and joining Slack channels, participating in discussion forums through The Hub, participating in academic and social discussion, and via posts, comments, questions, and responses to others. The creation of new channels and/or discussion topics is encouraged only when there is not an existing channel that covers the topic or interest. The creation of private channels is reserved solely for BloomTech staff and instructors. The naming of channels and content within is expected to be professional and in line with the policies and procedures found in the Code of Conduct and Catalog.

BloomTech reserves the right to delete Slack channels, Hub forum discussions, and content (posts, images, emojis, threads, questions, comments, and responses) that are not aligned with our mission, values, Catalog, or Code of Conduct.

Additionally, inappropriate behavior on Slack, Zoom, The Hub, and other BloomTech platforms includes, but is not limited to:

- Calling attention to all community members using the @channel or @here function without explicit permission given by staff
- @'ing, and/or otherwise harassing, bullying, being disrespectful, inappropriate, or unprofessionally calling out individuals (Learners, staff, and instructors)
- Failing to follow the directions of staff or instructors (for example, continuing to post when directed not to)
- Being a disruption to the community
- Being disrespectful toward others (Learners, staff, instructors, and the school)
- Providing feedback in ways other than directed (for example, in channels outside the scope of where feedback was directed by the school)
- Spamming Learners, staff, or instructors
- Shopping for different answers (for example, sending direct messages to multiple staff and/or instructors about the same issue after already having received an answer)
- Using channels for solicitation/marketing of a personal business or for personal gain
- Misuse of channels - using channels for something other than the intended purpose
• Posting political content in channels other than #politics

**Conduct on Camera**
While the following expectations described here are primarily for Zoom interactions, they may apply elsewhere in the program.

• Food: eating should be kept to a minimum while on camera and should not distract or disrupt others.
• Drinks: Alcohol is not to be consumed while on camera. This also includes having alcohol in sight or on display while on camera.
• Smoking/Smokeless tobacco: Smoking of any kind (cigarette, vaping, e-cigarette, etc.) is not permitted while on camera. This also includes chewing tobacco.
• Clothing: It is expected that Learners are fully clothed while on camera and that their clothing does not contain any obscene, offensive, or derogatory messages or images.

**Account Pictures**
Learners are expected to add a profile picture to their BloomTech associated accounts. This picture must be a professional looking picture of the Learner's face. The picture may not be a caricature, drawing, or cartoon image of the Learner's likeness. It is not acceptable to have any other image for a profile picture in platforms used for BloomTech.

**Names**
Learners are expected to use their legal name for Slack, The Hub, Zoom, and all communication within BloomTech. Learners who utilize a preferred name will need to submit a support ticket in the Hub so that we may update records.

**Safety**
BloomTech is committed to safety and encourages Learners to take precautions at all times, including but not limited to while using Zoom. Learners should use Zoom to attend live sessions, guided projects, and meetings while in a space where they are able to concentrate and not endanger themselves or others. We encourage Learners to use their best judgment and not participate in dangerous and/or physical activities while on Zoom, including but not limited to driving.

**Recording and Screenshots**
BloomTech values and respects Learner, staff, and instructor privacy. It is expected that all Learners will respect this privacy as well. Therefore, it is considered a violation of the Code of Conduct to:

• Use electronic or other devices to make an audio, photographic, screenshot, or video record of a person(s) without prior knowledge or permission in each instance.
● Store, share, or distribute such records by any means, including the unauthorized recording of personal conversations, images, meetings, or activities.
● Create, store, share, or distribute created likeness of any person(s) without prior knowledge or permission. This includes, but is not limited to, emojis, gifs, and memes.

Please note that screenshots may be taken and used for the purpose of reporting behavioral concerns to BloomTech staff. These should be submitted through a support ticket in the Hub, and not shared in Slack channels. Additionally, taking screenshots and sharing snippets of code or class material for the purpose of soliciting help or assistance in understanding a concept is permitted.

Feedback
BloomTech encourages critical thought, discourse, and feedback from our Learners, including reflections on the school itself, our policies, or anything else. We value Learner feedback and welcome it anytime via a support ticket in the Hub, communication with staff and instructors, and others. Please note that while learners may choose to talk to a staff member or instructor, support tickets in The Hub are the official means of communication regarding feedback or a concern.

GRADUATION REQUIREMENTS
Students must pass the requirements for each sprint in order to progress to the next sprint. Students are considered a “graduate” once they have received a passing grade for every sprint in their program. Students must complete these requirements and satisfy the hours for their program within the maximum time allotted for program completion (960 hours for Web & DS and 1440 for Backend).

Students that meet these requirements will be issued a Certificate of Completion from Bloom Institute of Technology for program completion within 60 days of graduation. A test-out process is available for students who qualify. Students should submit a Support Ticket to inquire about testing out or to initiate the process.

STUDENT SERVICES

ACADEMIC ADVISING
Academic advising may be initiated by Bloom Institute of Technology personnel or the student when the need is identified. Students may initiate academic advising by submitting a support ticket in The Hub.
**HOUSING**

Bloom Institute of Technology's programs are all 100% online. Bloom Institute of Technology does not assume responsibility for student housing, does not have dormitory facilities under its control, nor offers student housing assistance.

According to rentals.com for San Francisco, CA rental properties can start at about $2,000 per month.

**LEARNING RESOURCES**

Bloom Institute of Technology provides all instructional materials necessary for the program. Bloom Institute of Technology does not maintain a library. Students may access the internet for additional resources. Internet resources are available 24 hours a day and accessible with an internet connection.

**CURRICULUM ACCESS**

While enrolled in and as an alum of the Bloom Institute of Technology, you may have access to past and/or current materials and resources (such as curriculum and projects) for the program you completed. You may use these materials for your continued self-study, to brush up on a new skill, or prepare for an interview or project. Access to BloomTech materials is for your personal use only and may not be shared or distributed to a third party. This includes, but is not limited to alumni or learners from programs other than your own, individuals/companies/groups not affiliated with BloomTech, repurposing or editing materials and claiming them as your own, or publishing materials or curriculum in any form on any platform.

BloomTech reserves the right to remove, alter, and/or discontinue access to this material at any time.

**ACCESSIBILITY AND ACCOMMODATIONS**

Bloom Institute of Technology welcomes and embraces diversity and is committed to providing otherwise qualified students equal access to programs and activities by having nondiscriminatory standards in all academic areas and reasonable accommodations. A reasonable accommodation is an adjustment or minor change that removes barriers. Reasonable accommodations do not involve lowering academic standards or alterations to a program. Please note that accommodations that were approved through another school or institution may not be approved at BloomTech due to the nature of the educational format of our programs and activities. Reasonable accommodations are evaluated and granted on an individualized basis. To begin the process of requesting accommodations, students should send an email to accommodations@bloomtech.com.
**LIBRARY**

Bloom Institute of Technology is a 100% online institution with no physical locations for students to learn from or meet. Bloom Institute of Technology does not have a traditional library due to their online presence and the subject matter taught.

Bloom Institute of Technology’s “library” is online and housed on the platform called Canvas. Within Canvas students have access to videos, assignments, daily syllabi, and resources Bloom Institute of Technology has created for students who need extra help.

**ZOOM**

Zoom is an online remote meeting service. While at Bloom Institute of Technology students will use Zoom to receive lectures, guided projects, pair program, work on group projects, receive 1:1 support from the Instruction team, and more.

Each student will be required to download Zoom and set up their free account before engaging in any live instruction experiences.

**THE HUB**

The Hub is a resource and communication tool at BloomTech, and contains the following:

- Announcements to all or part of the student body
- Discussion Forums where students and staff can ask questions and engage with course material
- Knowledge Base of articles and frequently asked questions, covering school policies and information as well as curricular content and supplemental resources
- Support Ticket function, for general inquiries as well as requesting instructional or technical support

**SLACK OR OTHER FORUMS**

Slack is an online communication tool used widely in the tech industry.. If a student has never used Slack before, they should get to know it well. Nearly every company in Silicon Valley uses it, and it's rapidly becoming a point of competence across software engineering teams.

Once a student has finalized their enrollment, we will add them to the student Slack workspace.

Typing a message in Slack that includes “@here” or “@channel” notifies everyone in that channel. This sends an alert to their desktop, or, in many cases, their personal cell phones. As such, these commands are reserved for instructors and BloomTech staff.
STUDENT RECORDS
Student records will be maintained on site at the administrative site for five years from the last date of attendance. Transcripts are maintained permanently.

NO GUARANTEE OF EMPLOYMENT
While Bloom Institute of Technology will assist graduates in developing job search skills such as resume and cover letter development, interviewing, and appropriate interview follow-up activities, it cannot and does not guarantee the student will find employment nor does it guarantee the student will realize a given salary following graduation.

GRIEVANCE PROCEDURE
If a concern occurs, the student is asked to discuss the matter with a BloomTech staff member. Students may raise the concern with any member of the team by submitting a support ticket through The Hub. If a resolution cannot be reached, students are asked to document their concern.

Documentation should include:
- Relevant dates
- A description of the original concern
- A summary of past conversations with BloomTech staff
- Desired outcome or resolution

The student should send the documentation to the Program Manager of Learner Success. After the documentation has been reviewed, the student can expect a response within 10 business days following receipt of the documentation.

A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling 888.370.7589 toll-free or by completing a complaint form, which can be obtained on the bureau’s Internet Web site, www.bppe.ca.gov.

CATALOG CHANGES
Information about Bloom Institute of Technology is published in this catalog, which contains a description of policies, procedures, and other information about the institution. Bloom Institute of Technology reserves the right to change any provision of the catalog at any time. Notice of changes will be communicated in a revised catalog, an addendum or supplement to the catalog, or other written format with an effective date. Students are expected to read and be familiar with the information contained in the catalog, in any revisions, supplements and addenda to the catalog, and with all institution policies. By enrolling in Bloom Institute of Technology, the student agrees to abide by the terms stated in the catalog and all institution policies.

ARTIFICIAL INTELLIGENCE
Certain portions of the tools and education services provided by BloomTech are created with the aid of artificial intelligence software. All such tools and services are
tested and/or verified by a human prior to use. **BloomTech's curriculum is 100% human designed.**

**PROGRAMS**
The programs herein are not described in sequential order. Additionally, units and sprint order may be subject to change. For the exact order in which you will receive your program, please review our website.

---

**FULL STACK WEB DEVELOPMENT**

Required Program Length: 960 hours / 24 Sprints

Cumulative Final Exam: None

Graduation Document: Certificate Of Completion

Standard Occupational Codes / Potential Employment Titles: 15-1134

Sample of reported job titles: Web Developer, Programmer, Software Engineer, Technology Applications Engineer, Web Development Director, Web Development Instructor, Webmaster

**Program Description:**
This program teaches the foundations of web development and computer science. Students will learn full-stack development with some of the most in-demand technologies. Upon successful completion of the program, students will have built and worked on multiple apps. This course of instruction prepares individuals for entry-level jobs such as: web developer, front-end developer, backend developer, and full-stack developer. Graduates may find suitable employment with technology companies, as well as traditional companies with the need for web applications and websites.

**Program Objectives:**
Upon successful completion of this program the student should be able to:
1. Develop Web application front ends using HTML, CSS, and JavaScript
2. Develop Web servers using Node.js and RDBMS such as SQLite and PostgreSQL
3. Understand, explain, and apply fundamental computer science concepts

**Program Outline:**

COURSE DESCRIPTIONS

Full Stack Web Development Core

JavaScript and HTML I
40 Hours
Everything we teach during the first couple months of your experience here at Bloom Institute of Technology revolves around software engineering for the web. One of the most powerful web languages is JavaScript. Without it, there is no modern web. Web browsers use JavaScript to power rich user experiences we have all come to expect.

Bloom Institute of Technology looks at JavaScript through this analogy. Think of a web page as a house. You need someone to architect and get in the structure of your house, someone to add in the design, and someone to add in the electricity to power the house. If you were to think about HTML, CSS and JavaScript as the three necessary building blocks, for a web page, HTML could be the blueprint of what your house should be, CSS is the design of your house and JavaScript powers the electrical interactions that your house needs to have in order to be functional.
JavaScript is everywhere today! And we have the opportunity here to dive deep enough into the language to teach you how to be proficient in building modern, complex and beautiful web applications that are used to power the web today!

**JavaScript and HTML II**
40 Hours
In this comprehensive sprint, you will develop essential skills for professional web developers. You will be introduced to git and GitHub for effective version control and team collaboration. The course delves into JavaScript, covering objects, arrays, and data manipulation techniques for dynamic web applications. Lastly, you will enhance your HTML and CSS proficiency, learning to create visually captivating and user-friendly websites by refining layout, colors, and typography. This well-rounded course will equip you with the tools to excel in modern web development.

**JavaScript and HTML III**
40 Hours
In this engaging sprint, we will continue guiding you through the fascinating world of JavaScript, diving deeper into the nuances of objects, functions, and the visually appealing aspects of CSS. We will explore advanced objects and functions in JavaScript, ensuring you understand how to harness their full potential. You'll also learn about elegant solutions to less-common coding problems, discovering how developers have tackled these challenges over the years. Finally, we'll enhance your HTML and CSS expertise by covering flexbox layouts and CSS specificity, equipping you with the skills needed to create captivating and interactive web experiences.

**Applied Computer Science 1**
40 Hours
Explore programming and problem solving skills that will prepare you to pass a technical exam and start working on your job search by completing career readiness activities.

**Applied JavaScript**
40 Hours
This week is all about exposing you to applying your Javascript knowledge to the Document Object Model and creating rich Javascript user interfaces.

**Intro to React**
40 Hours
React is one of the most popular UI libraries today, and in terms of Single Page Applications many (including the react team) tend to think of the library as the “V” in MVC. That is, the View layer of the Model, View, Controller paradigm. React is a pattern, a mindset, that will help developers that use it, build small, reusable pieces of UI that can be easily put together to make a large scale application.

**Single Page Applications**
40 Hours
This week we'll be learning about using React Router. With the UI Library (React) and the Client Side Routing Library (React Router) you'll be able to craft rich, robust and highly scale-able Single Page Applications. We will also learn about controlling forms with React, and take our first look at what automated testing is.
**Applied Computer Science 2**
40 Hours
Explore programming and problem solving skills that will prepare you to pass a technical exam and start working on your job search by completing career readiness activities.

**Advanced React**
40 Hours
We continue our journey into React with some more advanced topics like class components, custom hooks, and testing.

**Advanced State Management**
40 Hours
Welcome to the extensive world of state management in React. In this sprint we'll get hands-on experience with Context API, Redux and more!

**Advanced Web Applications**
40 Hours
Here you'll learn important authentication techniques and automated deployment tools. Additionally, you will learn the skills necessary to automatically test the sophisticated applications you've been building.

**Applied Computer Science 3**
40 Hours
Explore programming and problem solving skills that will prepare you to pass a technical exam and start working on your job search by completing career readiness activities.

**Build a Web API**
40 Hours
In this sprint you will learn about Node.js, a runtime environment used to execute JavaScript code outside the browser. You will also learn how to use the popular Express framework to build Web APIs based on the REST (Representational State Transfer) architectural style.

At the end of this sprint you will be able to build and deploy high performance RESTful Web APIs that can power all apps of all kinds: Internet of Things, Mobile and Web Applications.

**Adding Data Persistence**
40 Hours
Learn how to store and manage information using Relational Databases like SQLite and PostgreSQL. You will learn to manage the data stored in Relational Databases using JavaScript and Structured Query Language (SQL).

At the end of this sprint you will know how to design and build a Relational Database that satisfies user's requirements and add it to a Web API

**Authentication and Testing**
40 Hours
For this sprint you will learn how to secure the information managed by a Web API. You will learn how to use Sessions, Cookies and JSON Web Tokens (JWTs) to add Register, Login and Logout functionality.

**Applied Computer Science 4**
40 Hours
Explore programming and problem solving skills that will prepare you to pass a technical exam and start working on your job search by completing career readiness activities.

### Applied Computer Science

**Prerequisite:** Successful completion of all courses within Development Core

### Applied Computer Science 5 - 8 160 Hours

Learners will continue to build upon problem solving skills that will help improve their ability to solve coding challenges and attain higher scores on a technical exam. In addition, learners will receive personalized feedback on their career artifacts, opportunity to practice technical interviewing skills and attend information sessions offered by hiring partners.

### Bloom Institute of Technology Labs

**Prerequisite:** Successful completion of all courses within Development Core

### BloomTech Labs: Labs 1 - 4 160 Hours

Bloom Institute of Technology offers students a professional immersive experience during Labs. They gain valuable experiential practice that solidifies their core skill learnings. They learn how to operate in an agile environment and follow a standard development process.

### DATA SCIENCE

**Required Program Length:** 960 hours / 24 Sprints

**Cumulative Final Exam:** None  
**Graduation Document:** Certificate Of Completion  
**Standard Occupational Codes / Potential Employment Titles:** 15-1111  
**Sample of reported job titles:** Data Scientist, Data Analyst, Business Intelligence Analyst, Machine Learning Engineer, Data Engineer, Software Engineer

**Program Description:**

In this program students learn industry-current tools and techniques for data science, adopting best practices in the Python ecosystem. This program will take the student from a solid foundation to employing advanced statistical models. This course of instruction prepares individuals for entry-level jobs such as data analyst and machine learning engineer. Graduates may find suitable employment with technology companies as well as traditional companies looking to take better advantage of their existing data.

**Program Objectives:**

Upon successful completion of this program the student should be able to:

1. Analyze data of a variety of types  
2. Build reproducible analyses and data-powered systems
3. Be able to glean, communicate, and build on insights from data

**COURSE DESCRIPTIONS**

**Data Science Core Courses**
Data Wrangling and Storytelling  40 Hours
Loading data is a fundamental, and deceptively challenging, step. Getting it in the right "shape" and format for analysis and modeling is always a challenge. This week we'll practice these skills, and learn to appreciate the many tools Python gives us for these tasks.

Statistical Tests and Experiments  40 Hours
An important application of statistics is designing and evaluating experiments. In the context of web applications, often this means an A/B test where users are exposed to different versions of a site and their behavior/outcomes compared.

How do you design a good, and valid, experiment? How long should you run your experiment? How do you evaluate the outcome of an experiment? How do you balance all this math and science with the practical business and product concerns you're working with? These are the sorts of questions we'll discuss in this sprint.

Linear Algebra  40 Hours
Linear Algebra is the foundation of nearly all the numerical routines used for practical statistics and machine learning. It's a deep topic, but this week we'll learn enough to appreciate how it is used and applied to the many models we'll learn.

Applied Computer Science 1  40 Hours
Explore programming and problem solving skills that will prepare you to pass a technical exam and start working on your job search by completing career readiness activities.

Linear Models  40 Hours
Unit 2 is about Predictive Modeling, also known as supervised machine learning with labeled, tabular data! We can make models to predict continuous numbers, and answer questions like "How much?" or "How many?" This modeling task is called regression. We'll begin our study of predictive modeling with linear models for regression tasks: ordinary least squares regression, and ridge regression. We can also make models to predict discrete classes, and answer questions like "Is this A or B or C?" This modeling task is called classification. We'll continue our study of predictive modeling with a linear model for classification tasks, called logistic regression.

Kaggle Challenge  40 Hours
We'll continue our study of predictive modeling with tree-based models, such as decision trees and random forests. We'll also learn how to clean data with outliers, impute missing values, encode categoricals, and engineer new features. This sprint, your project is about water pumps in Tanzania. Can you predict which water pumps are faulty?

Applied Modeling  40 Hours
For your portfolio project, you will choose your own labeled, tabular dataset, train a predictive model, and publish a web app or blog post with visualizations to explain your model. You will use your chosen dataset for all assignments during the Applied
Modeling sprint. You’ll learn how to define machine learning problems, begin the modeling process, choose targets, choose evaluation metrics, and avoid leakage. You’ll improve your model predictions with powerful models like gradient boosting and feature selection techniques like hyperparameter optimization. You’ll improve your model interpretation with insightful visualizations like partial dependence plots and shapley value force plots. Applying predictive modeling to real decisions isn’t easy, but these are the skills employers are looking for!

**Applied Computer Science 2** 40 Hours
Explore programming and problem solving skills that will prepare you to pass a technical exam and start working on your job search by completing career readiness activities

**Software Engineering and Reproducible Research** 40 Hours
“A data scientist knows more about statistics than a software engineer, and more about programming than a statistician.”

Being a data scientist means applying statistics and analysis of data, writing real working code that runs and gets results. You’ve been doing that your entire time at Bloom Institute of Technology, but much of our work has been in the land of Python notebooks, a useful but limited environment intended for exploration, not engineering.

Some place a divide between science and engineering – theory and practice, ideas and application. A skilled data scientist masters both: science informs engineering, and engineering increases the rigor of science by making it reproducible and scalable.

In this unit we will build the core skills needed to communicate and work with software engineers. You may have pleasantly surprised colleagues if you not only know the latest and greatest machine learning model but build and approach it with software development best practices.

To do this, we will go beyond Python notebooks, into the world of modules, packages, containers, and more.

**SQL and Databases** 40 Hours
What does “data” look like? If you try to picture it, you probably see rows and columns on a spreadsheet or CSV, that can be conveniently loaded with pandas and cleaned and analyzed from there. As a data scientist, this will often be the form you want your data to be in, but it’s probably not how your data started.

Most modern data is generated automatically by human interaction with a web-backed application – every app they download, every click they make, all travels over a network and is saved by the server. Though in the rawest of forms this may be a log file, in most cases where it really goes is a database.

So, what is a database? A place for data! If it’s relational, it’s actually still pretty close to that rows and columns picture, though with some important additional functionality.
These databases are commonly accessed using SQL – Structured Query Language – a standard based on relational algebra, and a useful tool known not just by data scientists but by software engineers, MBAs, and more.

If it’s so-called “NoSQL,” then it’s most likely a document-oriented database (or document store), which, despite the glamor, is essentially a bunch of key-value pairs. What key-value pair object are you already familiar with? Python dicts!

In this sprint we will learn about both of the above paradigms, and how the separation between them is not as fine a line as you may think.

Productzization and Cloud 40 Hours
For a computer program to be “real”, it has to be available – these days, that means deployed to the cloud. But what is the cloud, and what does it mean to build and deploy something to it? We’ll learn that and more in this sprint.

Applied Computer Science 3 40 Hours
Explore programming and problem solving skills that will prepare you to pass a technical exam and start working on your job search by completing career readiness activities

Natural Language Processing 40 Hours
A particularly common set of unstructured data is the sort of information you are consuming right now – natural language, in written or spoken form.

Human language is a fascinating phenomenon and powerful expressive tool, but despite the many rules of grammar language is not a fully defined deterministic system in the same way that programming languages (like Python) are. Language can be thought of as semi-structured, but even the structure it has (nouns, adjectives, verbs, etc.) can be difficult to recognize. Most humans are fluent in one or more languages, but even that fluency doesn’t mean they can explicitly list or consciously understand the “rules” they are following.

Nonetheless, human language is the main form of content on the Internet (and beyond), and the ability to computationally process it at scale can lead to many compelling products. A brand may want to track the sentiment of users towards them on social media before and after an advertising campaign, or a news service may want to recognize key entities in a news story to generate a high-quality automated summary. But text is not numbers, and even representing it as ASCII/Unicode values doesn’t capture the meaning, just the abstract labeling of symbols. How can we hope to achieve these sorts of tasks?

In this sprint we will learn assorted NLP (Natural Language Processing) techniques. Many involve cleaning and preprocessing, which can then allow us to feed the data into the more traditional statistical models we are familiar with. There are also more advanced specialized models that are particularly conducive to NLP which we will address.
Neural Network Foundations  40 Hours
Neural Networks, or the latest and greatest in predictive modeling. Or is it? Inspired by biology and based on math that's been around for decades, the past few years have seen some pretty impressive results as computational resources allow running much larger networks.

Major Neural Network Architectures  40 Hours
Now that you've learned the foundations of Neural Networks, it's time to go deep! All "deep learning" really means is "there's at least some hidden layers," but there's a great deal of variety both in the layer architecture and the behavior of individual "neurons" in the network.

We'll study a few of the most effective recent innovations in neural networks and deep learning and think a bit about what the future may hold. Is deep learning the path to artificial general intelligence? Probably not – but it's a pretty useful tool along the way.

Applied Computer Science 4  40 Hours
Explore programming and problem solving skills that will prepare you to pass a technical exam and start working on your job search by completing career readiness activities

Applied Computer Science

Prerequisite: Successful completion of all courses within Development Core

Applied Computer Science 5 - 8  160 Hours
Learners will continue to build upon problem solving skills that will help improve their ability to solve coding challenges and attain higher scores on a technical exam. In addition, learners will receive personalized feedback on their career artifacts, opportunity to practice technical interviewing skills and attend information sessions offered by hiring partners.

Bloom Institute of Technology Labs

Prerequisite: Successful completion of all courses within Development Core

BloomTech Labs: Labs 1 - 4  160 Hours
Bloom Institute of Technology offers students a professional immersive experience during Labs. They gain valuable experiential practice that solidifies their core skill learnings. They learn how to operate in an agile environment and follow a standard development process.
**ENTERPRISE BACKEND DEVELOPMENT**

**Required Program Length:** 1440 hours / 36 Sprints

**Cumulative Final Exam:** None  
**Graduation Document:** Certificate Of Completion  
**Standard Occupational Codes / Potential Employment Titles:** 15-1133  
**Sample of reported job titles:** Computer Programmer, Software Developer, Web Developer, Programmer, Software Engineer, Technology Applications Engineer, Web Architect, Web Development Director, Web Development Instructor, Webmaster, Backend Engineer, Backend Developer

**Program Description:**  
This program teaches the foundations of backend development and computer science. Students will learn backend development with some of the most in-demand technologies. Upon completing the program, students will have worked on numerous projects built with the same tools that companies of all sizes use. Additionally, students will have engaged with the necessary Computer Science fundamentals to succeed as a software engineer. This course of instruction prepares individuals for entry-level software engineering and back-end developer jobs. Graduates may find suitable employment with technology companies and traditional companies with the need for back-end developers.

**Program Objectives:**  
Upon successful completion of this program, the student should be able to:  
- Convert a design into code and deliver it using best practices  
- Write secure, testable, and maintainable code  
- Understand when and why to use (or not) a broad range of data structures and algorithms  
- Create unit tests that thoroughly test functionality  
- Create integration tests that verify end-to-end service integration  
- Troubleshoot by debugging and reviewing errors, logfiles, and metrics  
- Contribute to planning and design using a scrum process  
- Demonstrate mastery of the program’s objectives

**TOTAL CORE HOURS** 232 888
Enterprise Backend Development

Java Fundamentals
40 Hours
In this sprint, you'll learn some basics about the command-line and using an IDE. You will also start with Git repositories, as well as variables, arithmetic operations, and producing output in the console. You'll learn about Strings, collecting user input in your programs, and using comments.

Continuing with Java
40 Hours
This sprint will enable you to continue getting more comfortable with Java programming fundamentals and object-oriented design. You will also start working with classes, objects, controlling access, and designing classes. You will learn about boolean logic, conditionals, and enums, and you will also start working with exceptions.

Loops and Data Structures
40 Hours
This sprint will ensure you are comfortable with all the Java programming and object-oriented basics you need to succeed in the rest of the program. You'll learn about loops and arrays. You will also start working with exceptions and make sure you understand "pass-by-value".

Gradle
40 Hours
You will begin to create more structured and intentionally designed applications. You will utilize Gradle as the build manager, adhere to specific design patterns, read and write from data files, and you will be designing class and sequence diagrams detailing the project's internal design.

Debugging
40 Hours
You will learn how Java is used to develop Backend (or Server) software applications. You will also learn how to ensure high code quality by creating a Test Plan and Unit Tests. One of the most valuable skills you will practice is how to “walk through” code using debugging tools. You will even “look under the hood” to understand how the Java Virtual Machine executes application code and manages the data and objects that make up the program's state.

Encapsulation and Generics
40 Hours
Here you'll explore some of the fundamental ideas behind OOP, or Object Oriented Programming, which has allowed software teams to build projects consisting of millions of lines of code without getting overwhelmed by complexity. Java is one of the most successful OOP languages.

As you start learning the basics of Encapsulation, Polymorphism, and other OOP concepts, you'll be able to work with large and complex codesets without getting lost. You'll be able to make meaningful contributions to teams and even start to build projects of your own.
Lists and Big O
Software projects can’t scale very well without managing lots of things together. In this sprint, you will learn about Lists. Lists are the first of many Java Collection objects you will get familiar with. You will learn how to compare two Java objects and how to sort lists.

BigO notation is a special vernacular that lets us define the complexity of methods and algorithms. BigO, together with some OOP terminology we started getting familiar with in the last sprint, is a new language. Not a programming language to talk to computers, but a programmer’s language you’ll use in your career!

Observer, State, and Regex
We will begin with an exploration of the Observer design pattern. We’ll see that often making requests to large databases can take a long time and use up a lot of bandwidth. We’ll then move on to learning data processing tools like RegEx which allows us to pattern-match text- very useful for parsing information out of a file. And speaking of files, we’ll learn to translate Java object data into human-readable text files and then back into Java objects. The JSON formation is just one of many standardized forms of transmitting data between applications, and because it is not language-specific and easy to transmit, it allows communication across platforms.

Inheritance and Polymorphism
Remote debugging is an essential tool for tracking down bugs and solutions. We will start this Sprint by showing you how to do just that. We will also introduce two design patterns that you may have already become acquainted with: inheritance and polymorphism. Finally, we will go over the concept of hashing which is used in great length and effect in many facets of computer science.

Sets and Maps
You will learn two new data structures in sets and maps. You will see these data structures used in many capacities (especially maps), and you will want to become very familiar with them. With these data structures and the design patterns you’ve learned, it’s time we learn some new strategies and patterns when designing our code. Designing and planning out your code will help you think like a computer scientist and start to see problems in a whole new way.

Mocking and AWS Lambda
You will learn how to mock a class to control its behaviors to give you the temporary results that you desire to test another class. Another important topic covered here is "static" and how it relates to methods and variables. Finally, we will build an AWS Lambda function. This will be your first real backend experience and things only get more interesting from here.

Implementing Advanced UML
You will be working with multiple Amazon Web Services and learning to have these services work together in a single project. Before we get to that we need to prepare a solid foundation of understanding. This sprint will be focusing on laying the groundwork for these advanced concepts.
**Intro to DynamoDB**  
40 Hours
So far, we have covered various concepts in Java. Now you will start to learn how to integrate this code with other components of our software. In this sprint, you will learn databases and how to read from and write to the databases. Then you will integrate databases with our Java code. You will also learn about RESTful APIs - what they are, how to write one and also how to call an API.

**Dependency Injection**  
40 Hours
Now that we have learned about databases and APIs, in this sprint you will learn how to write custom exceptions to enhance your code. You will also learn about dependency injection so you can automate dependencies. And lastly, you will learn about another data structure - Linked List.

**Searching and Recursion**  
40 Hours
You will learn various searching and sorting algorithms along with their time complexity. Then you will learn about recursion and its benefits. At the end, you will deploy the APIs you have created so far and create your own API Gateway.

**Applied Computer Science 1**  
40 Hours
Explore programming and problem solving skills that will prepare you to pass a technical exam and start working on your job search by completing career readiness activities.

**Learn and Be Curious 1**  
40 Hours
Learn and Be Curious is an opportunity for you to develop and build your own ideas. In this first sprint, you'll be designing the application you wish to build. You will come up with the idea, outline the technical requirements, create wireframes that show what the app should look like on the screen, and document your designs to be reviewed by your instructor before you build it. Take your time in the design sprint and plan a project that meets the requirements and takes two weeks to complete.

**Learn and Be Curious 2**  
40 Hours
Learn and Be Curious is an opportunity for you to develop and build your own ideas. You'll be tasked to come up with a plan, build the project, and present your work at the end of the unit, all resulting in a fantastic portfolio piece and a great learning experience. As you're working on your project, feel free to reach out to other learners to brainstorm ideas and help solve technical issues. If you'd prefer, you can team up with others in this unit and learn how to work in a team environment. The guided projects and Code-Alongs in Learn and Be Curious are geared toward helping you plan and design your project. You'll use the tools you've learned throughout this course to bring your plans to life. Take your time in the design sprint and plan a project that meets the requirements and takes two weeks to complete.

**Learn and Be Curious 3**  
40 Hours
In the last Learn and Be Curious sprint, you'll finish building your project and prepare to present it to your instructor. This project will likely become one of your best projects.
on your resume, and all the artifacts are intended to help you stand out among your peers in the job search.

**Applied Computer Science 2**  
40 Hours  
Explore programming and problem solving skills that will prepare you to pass a technical exam and start working on your job search by completing career readiness activities.

**Sprint and Query**  
40 Hours  
In this sprint, we will dig deeper into processing linear Collections class objects as well as create a simple server based application. In addition your knowledge of DynamoDB queries and delete operations will be enhanced.

**Stacks, Immutability, and Caching**  
40 Hours  
You will learn about two new data structure options for storing and processing data. Pitfalls of each and how to avoid those pitfalls will also be presented. Examination of common application performance bottlenecks will be discussed as well as how to identify them and determine options for solving them. You will start your journey into the world of concurrent processing will begin with the concepts of immutability and caching.

**Threads**  
40 Hours  
In this sprint, we will continue our journey into concurrency by discussing threads and thread management. Defining and storing metrics regarding program performance and application processing in a cloud based data store will be presented. Use of Lambda Expressions with Stream class methods for linear data structure processing rounds out the Sprint.

**Applied Computer Science 3**  
40 Hours  
Explore programming and problem solving skills that will prepare you to pass a technical exam and start working on your job search by completing career readiness activities

**Converting Data**  
40 Hours  
You will discover when and how to use Optionals in a real-world setting. You will gain a better understanding of Streams, Serialization, and De-serialization. You will be scanning a DynamoDB table to filter and select a portion of relevant data while also refactoring a code base to fix issues. You will incorporate all of the above into the code and understand when to refactor said code, and use the methodologies and flows in a real-world setting. Throughout your career, you use these techniques to build meaningful and performant data-driven applications along with a subset of skills that you will pick up, such as refactoring and reworking bad/unperforming code into better, cleaner, and more well-managed code.

**Advanced Threads**  
40 Hours  
You will learn how and when to use Executor Services, Futures, and Trees in a Thread Safe manner to allow you to gain a better understanding of their usage in a real-world setting to help consolidate your learning thus far.
Relational Databases
You will learn Graphs and how to traverse them in a real-world setting. We will cover Service Design methodologies and get a first-hand experience with them. You will also learn structured query language and how it pertains to relational databases. Finally, we will review the subject matter you have already learned to solidify your understanding. All of the topics in this sprint help make you a complete software engineer and give you some ancillary knowledge.

Applied Computer Science 4
Explore programming and problem solving skills that will prepare you to pass a technical exam and start working on your job search by completing career readiness activities.

Applied Computer Science

Prerequisite: Successful completion of all courses within Development Core

Applied Computer Science 5 - 8
Learners will continue to build upon problem solving skills that will help improve their ability to solve coding challenges and attain higher scores on a technical exam. In addition, learners will receive personalized feedback on their career artifacts, opportunity to practice technical interviewing skills and attend information sessions offered by hiring partners.

Bloom Institute of Technology Labs

Prerequisite: Successful completion of all courses within Development Core

BloomTech Labs: Labs 1 - 4
Bloom Institute of Technology offers students a professional immersive experience during Labs. They gain valuable experiential practice that solidifies their core skill learnings. They learn how to operate in an agile environment and follow a standard development process.

WEB3 DEVELOPMENT

BLOOMTECH IS NO LONGER ACCEPTING NEW STUDENTS FOR ITS WEB.

Required Program Length: 150 hours / 10 Sprints

Cumulative Final Exam: Practical exam
Graduation Document: Certificate Of Completion
Standard Occupational Codes / Potential Employment Titles: 15-1133
Sample of reported job titles: Web3 Developer, Crypto Developer, Blockchain
Program Description:
In this program students learn industry current concepts, applications and techniques required to develop Web3 applications. The Web3 Developer course offers an upskilling opportunity for experienced developers seeking to change careers or who are crypto-curious. Concepts and practical skills are taught through a hybrid approach combining self-pacing and live group interaction. Community is established via instructors and learners investigating and solving practical problems by curriculum concepts. This course is designed to meet the needs of working professionals; learners may choose to work through some sprints more quickly than others. In general Sprint times listed below are approximated.

Program Requirements:
1. 1-2 years of writing production software in Javascript or syntactical supersets like TypeScript are critical for success in this program.
2. We will be utilizing bash scripting for various commands throughout this course and a working knowledge of any shell scripting language is required to be successful in this program.
3. Git and a working knowledge of version control systems, like GitHub, are required to be successful in this program.
4. OPTIONAL: Ability to purchase 0.1 ETH for deploying to Ethereum mainnet

Program Objectives:
Upon successful completion of this program, students should be able to:
- Deploy smart contracts and ancillary services to Ethereum mainnet
- Write secure & efficient contracts through application of Ethereum Virtual Machine (EVM)
- Build DeFi applications
- Produce project artifacts to potential employers leading to work as a Solidity developer

Test Coins/Cryptocurrency: BloomTech may ask learners to use test coins for educational purposes only. Learners are not required to use real coins or cryptocurrency as part of their BloomTech education. Learners who elect to use their wallet, real coins, or any cryptocurrency in connection to their BloomTech education or otherwise, assume all risks. Using real coins, cryptocurrency, or attaching a virtual wallet may result in a loss of money. Information provided by BloomTech does not constitute investment, financial, trading, or tax advice in any way. BloomTech is not responsible or liable for any losses, damages or claims associated with the use of coins or cryptocurrency.
**Program Schedule:** Content consumption is self-paced including evenings and weekends. Regular office hours are generally available.

**WEB3 Development**

**Introduction to Ethereum and Smart Contracts** 15 Hours

Forming a solid foundation in the fundamentals of Ethereum and Smart Contracts. In this Sprint, we discuss the differences between Bitcon and Ethereum; explain nodes, wallets, transactions and transaction fees. We will also create a Metamask application to exchange test coins.

**Solidity Programming Language and Your First Smart Contract** 15 Hours

This Sprint uses Solidity as the framework for teaching Smart Contract development. In this Sprint, we introduce learners to the programming languages and applications required to support Solidity. We concentrate on Solidity’s syntax and deploy a contract to a testnet.

**Testing Solidity Smart Contracts** 15 Hours

This Sprint requires learners to write a comprehensive test suite and analyze the
results to determine the strength of the contract. The test suite consists of current applications designed specifically to check the accuracy of Contract components. For this Sprint, learners will use a Contract designed by BloomTech Instructional staff.

**Solidity and Smart Contract Design Patterns**  
15 Hours
This Sprint builds on the previous Sprints by adding additional complex syntax and library functions. Learners will create and deploy a contract on Ethereum and asks proposers and solvers to contribute through calling functions.

**Reading and Interacting with your Smart Contract using The Graph and React**  
15 Hours
This Sprint concentrates on two specific tools: The Graph and React which are needed to create Frontend DAPPS. Learners will use the contracts developed in previous Sprints to design, implement and deploy a subgraph and react app.

**Monitoring Your Protocol**  
15 Hours
This Sprint provides learners with the tools and knowledge to monitor the network health of the DAPPS they created in the previous Sprint. Learning to monitor protocol is a prerequisite skill needed for the next Sprint.

**Blockchain Cryptography and the Ethereum Virtual Machine (EVM)**  
15 Hours
This Sprint specializes in teaching the cryptography skills needed to secure transaction on a blockchain including creating and securing blocks and transactions and checking balances.

**Ethereum Tokens, ERC20 and ERC-721 (NFT)**  
15 Hours
This Sprint teaches learners the fundamentals of and applications needed for creating, deploying and testing NFTs.

**Decentralized Finance (DeFi)**  
15 Hours
This Sprint teaches the concepts associated with Decentralized Finance (DeFi). Learners will gain the skills to Buy and Sell ERC20 coins, add and remove liquidity, stake coins to gain passive rewards and understand price oracle concepts.

**Hacking Smart Contracts: Devastating Vulnerabilities Gas Optimization**  
15 Hours
The final Sprint of the course introduces how to recognize and prevent myriad external threats to Smart Contracts. The final practical examination will require students to attack 4 different smart contracts (provided by BloomTech instructors), identify the vulnerabilities and implement fixes for these issues.
MANAGEMENT AND FACULTY

BOARD OF TRUSTEES
JOHN DANNER, Dunce Capital - Board Member
STEPHEN OSKOUI, Managing Partner at Gigafund - Board Member
AUSTEN ALLRED, Co-Founder and CEO - Board Member
ELIAS TORRES, Drift - Board Member

MANAGEMENT
AUSTEN ALLRED, Co-Founder/CEO
ZORAN Martinovic, Chief Operating Officer
MARI NAZARY, Vice President of Learning
ALIONA DAMERON, Director of Instruction
JOSH KNELL, Director - Instructional Design

**STATE OF CALIFORNIA CONSUMER INFORMATION**

As a prospective student, you are encouraged to review this catalog prior to signing an enrollment agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an enrollment agreement.

The programs offered at Bloom Institute of Technology are not designed nor lead to positions in a profession, occupation, trade, or career field requiring licensure in the state of California.
Any questions a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education at p.o Box 980818, West Sacramento, CA 95798-0818, www.bppe.ca.gov, toll-free telephone number (888) 370-7589 or by fax (916) 263-1897.

Bloom Institute of Technology has never filed a bankruptcy petition, operated as a debtor in possession or had a petition of bankruptcy filed against it within the preceding five years that resulted in reorganization under Chapter 11 of the United States Bankruptcy Code (11 U.S.C. Sec. 1101 et seq.).

Bloom Institute of Technology does not participate in federal or state financial aid programs.

Bloom Institute of Technology is not accredited by an agency recognized by the United States Department of Education (USDE) and students are not eligible for federal financial aid programs.

**STUDENT TUITION RECOVERY FUND**

The State of California established the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic loss suffered by a student in an educational program at a qualifying institution, who is or was a California resident while enrolled, or was enrolled in a residency program, if the student enrolled in the institution, prepaid tuition, and suffered an economic loss. Unless relieved of the obligation to do so, you must pay the state-imposed assessment for the STRF, or it must be paid on your behalf, if you are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition.

You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if you are not a California resident, or are not enrolled in a residency program.”

(b) In addition to the statement required under subdivision (a) of this section, a qualifying institution shall include the following statement in its school catalog:

It is important that you keep copies of your enrollment agreement, financial aid documents, receipts, or any other information that documents the amount paid to the school. Questions regarding the STRF may be directed to the Bureau for Private Postsecondary Education, 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833, (916) 431-6959 or (888) 370-7589.
To be eligible for STRF, you must be a California resident or are enrolled in a residency program, prepaid tuition, paid or deemed to have paid the STRF assessment, and suffered an economic loss as a result of any of the following:

1. The institution, a location of the institution, or an educational program offered by the institution was closed or discontinued, and you did not choose to participate in a teach-out plan approved by the Bureau or did not complete a chosen teach-out plan approved by the Bureau.

2. You were enrolled at an institution or a location of the institution within the 120 day period before the closure of the institution or location of the institution, or were enrolled in an educational program within the 120 day period before the program was discontinued.

3. You were enrolled at an institution or a location of the institution more than 120 days before the closure of the institution or location of the institution, in an educational program offered by the institution as to which the Bureau determined there was a significant decline in the quality or value of the program more than 120 days before closure.

4. The institution has been ordered to pay a refund by the Bureau but has failed to do so.

5. The institution has failed to pay or reimburse loan proceeds under a federal student loan program as required by law, or has failed to pay or reimburse proceeds received by the institution in excess of tuition and other costs.

6. You have been awarded restitution, a refund, or other monetary award by an arbitrator or court, based on a violation of this chapter by an institution or representative of an institution, but have been unable to collect the award from the institution.

7. You sought legal counsel that resulted in the cancellation of one or more of your student loans and have an invoice for services rendered and evidence of the cancellation of the student loan or loans.

To qualify for STRF reimbursement, the application must be received within four (4) years from the date of the action or event that made the student eligible for recovery from STRF.

A student whose loan is revived by a loan holder or debt collector after a period of noncollection may, at any time, file a written application for recovery from STRF for the debt that would have otherwise been eligible for recovery. If it has been more than four (4) years since the action or event that made the student eligible, the student
must have filed a written application for recovery within the original four (4) year period, unless the period has been extended by another act of law.
